

Name \_\_\_\_\_

*Blackworm comparison* (Note: Use your notes and book to help you.)

1. DRAW and LABEL the picture of the blackworm as it appears on page 34 in your book.

2. One or both ends of some blackworms appear lighter in color than the rest of their bodies. Explain why this is so.

3. Why do blackworms make some of their unusual movements?

4. Use the Venn diagram to summarize the similarities and differences between a blackworm and the common earthworm. You need at least **4 SPECIFIC** similarities AND at least **4 SPECIFIC** differences for each type of worm.
